

Chapter 2

METHODOLOGY

Research Design

What research type will you use in your study?. Examples: descriptive research, developmental research, experimental research, quasi-experimental, and others. Discuss why you will use it

Materials and Procedures

Include all materials and procedures to be used in your study.

Include SDLC model you will use if your study is developmental

Include the survey questionnaire

How will you answer the statement of objectives?

Data Gathering

What data will you gather in each statement of objectives?

If the respondents are many, use the table below. If not, total enumeration shall be used.

Table 1. Distribution of Respondents

Respondents	Total Population	Sample Population
	N	n

TOTAL

Data Analysis

State the statistical tool you will use to analyze the data. Examples are mean, median, frequency count, and others. Likewise, include Likert Scale if needed.

LITERATURE CITED

List all related studies or literature used in your studies. Follow APA 7th Edition Format
